PROFESSIONAL SUMMARY

Aspiring Software Engineer with a strong foundation in Full-stack development and problem-solving, seeking an opportunity to contribute to real-world projects, build scalable systems, and grow as a technology professional.

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML5, CSS3

Frameworks & Libraries: Spring Boot, Spring Security, Hibernate (JPA), JDBC

Databases: MySQL, Oracle SQL (DDL/DML, joins, indexing, CRUD operations)

Tools & Platforms: Git, GitHub, IntelliJ IDEA, VS Code

Concepts: Data Structures & Algorithms, OOP, RESTful API Design, JWT, MVC

EXPERIENCE

JSpiders Training & Development Center

Bengaluru, Karnataka

Java Full-Stack Developer Intern

Feb 2026 – Present

- Designed and delivered backend modules using Java, Hibernate, JDBC, and Servlets, achieving a 30% reduction in boilerplate code through ORM best practices.
- Engineered responsive user interfaces using HTML5, CSS3, and JavaScript, improving UI consistency across target screen sizes.
- Architected and executed full CRUD workflows against relational databases (MySQL/Oracle SQL), including complex multi-table joins and optimized query design.

PROJECTS

Job Portal System | *Java, Spring Boot, Spring Security, JWT, MySQL* [GitHub]

- Architected a full-stack job portal supporting dual user roles (job seekers and recruiters) for end-to-end profile and application workflows.
- Secured all 15+ RESTful API endpoints with JWT-based stateless authentication and role-based access control (RBAC) via Spring Security.
- Delivered advanced features including full-text job search, resume management, and an application tracking system to improve matching efficiency.

Intelligent Video Surveillance for Alzheimer's Patients | *Python, OpenCV, YOLO* [GitHub]

- Developed an AI-powered CCTV monitoring platform to provide real-time safety oversight, reducing caregiver response time via automated alerts.
- Integrated YOLOv5 based object detection and engineered modular fall detection algorithms through multi-frame video analysis.
- Implemented an automated multi-channel alert system (Email) for emergency notifications upon incident detection.

Real-Time Weather Forecasting App | *HTML, CSS, JS, OpenWeatherMap API* [GitHub]

- Developed a responsive web application integrating external REST APIs to surface live meteorological data and a 7-day extended forecast.
- Optimized front-end rendering for mobile and desktop viewports, ensuring a seamless cross-device user experience without external frameworks.

EDUCATION

Don Bosco Institute of Technology

Bengaluru, Karnataka

Bachelor of Engineering in Computer Science & Engineering (CGPA: 8.5/10.0)

2022 – 2026

MASVS Gurukula PU College

Mysuru, Karnataka

Pre-University Certificate (PCMC) (Score: 93%)

2020 – 2022

CERTIFICATIONS

Software Engineering Virtual Experience | *J.P. Morgan Chase & Co. (Forage)*

- Completed simulation tasks covering financial data analysis, API integration, and backend system design modeled on enterprise engineering workflows.
